A LA CARTE

All good SEO starts with a concrete understanding of what a client wants and what will answer their question. You then also need to reflect brand affinity and a seamless website UX. We don't just aim for rank 1 on Google; we look at which keywords, pages, customer segments & products are most profitable and guarantee our SEO is tailored to deliver not just visibility but a business ROI.

On-site SEO Content optimizations

Once we understand the keywords that are likely to bring the most traffic to your website, it's time to start incorporating them into the most relevant pages. Based on page-by-page priority, we provide optimization tips for headings, text, image aliases, and anything else that can help improve ranking.

Technical SEO Audits

Including the most well developed websites can get errors over time. Our technical SEO audits are designed to detect any issues to rectify them before they have a detrimental effect and ensure your website is fully operational, ready to attract and convert more traffic. We work with the development team to get the issues fixed.

Link Building

To help maintain a competitive advantage over other brands, it is important that your website is as trustworthy as possible in the eyes of search engines. Domain authority is affected by the number and quality of external websites linking to you, and this is where SEO awareness and link building elements come into play. We monitor competitor backlinks, source link opportunities, collaborate with destination websites, and provide the content assets that make your site worth linking to.

OUR SEO SERVICE

Establishing Digital Goals

Our SEO strategy is useless if it doesn't align with your marketing goals, which is why we first discuss and set up your SEO goals with you.

01

Complete SEO Analysis

Analyzing your website completely is the next big step that we take; we list down all major changes before we start our work.

02

Targeted Keyword Research

Our experts then dig out the best suitable keywords according to your target market, making sure the SEO strategy is supporting your goals.

03

On-Page Optimization

After the keyword research, our on-page SEO experts substitute the professionally written metas along with the schema integration process.

04

Link Building

Building your website's authority is the next big step that we have to take, which our off-page SEO experts can assist you in doing.

05

Tracking & Reporting

We help you stay in the know with step-by-step consultation along with excellent insights each month, helping you analyze our efforts.
